

GDPR.

Have you missed something?

SharePoint and Office 365 have excellent support tools for managing many aspects of GDPR compliance. However, if you haven't checked to make sure that all your PDF documents are fully searchable you risk compliance failure.

See overleaf to discover how to check your Site Collections today.

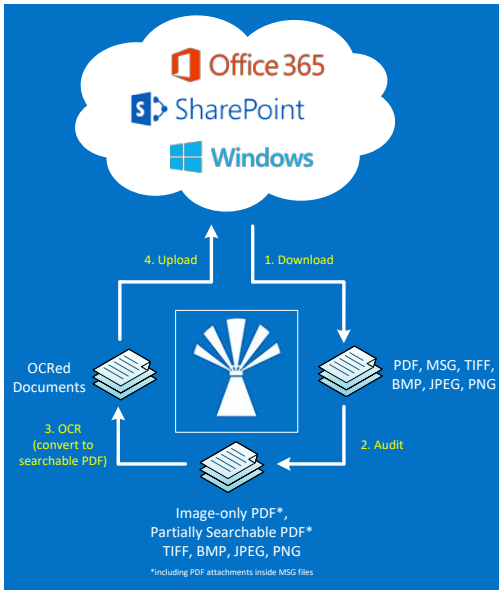

Aquaforest Searchlight®

Findability for GDPR

Studies have shown that in many organizations 20% of documents are not fully text searchable. To solve this problem, Aquaforest Searchlight audits SharePoint content and automatically OCRs Image PDFs and other image files where needed so the content can be fully indexed by SharePoint and Office365.

Aquaforest's Findability Solutions for SharePoint and Office 365 dramatically improve search success by ensuring that Site Collections are fully text searchable and Metadata is automatically added to documents.

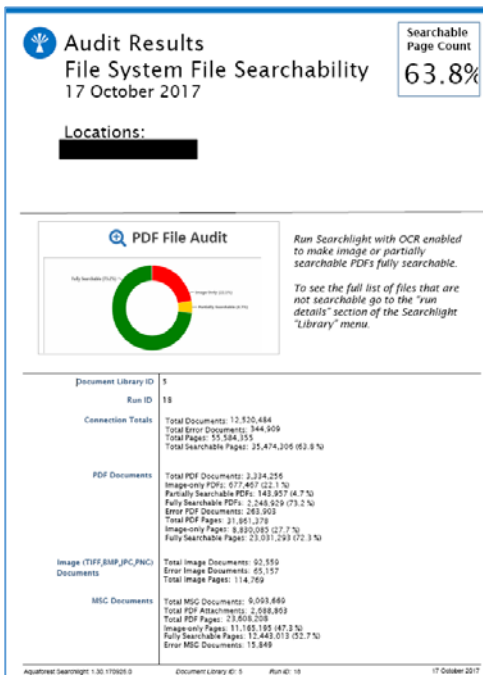

Run a free audit today

The trial version of Aquaforest Searchlight allows unlimited auditing which will allow you to determine how many of your PDF files are not fully text searchable.

The software is capable of auditing very high volumes of files, and has support for up to 64 CPU cores.

Visit www.aquaforest.com and download a trial copy of Aquaforest Searchlight today.
